Coding Club Day 1

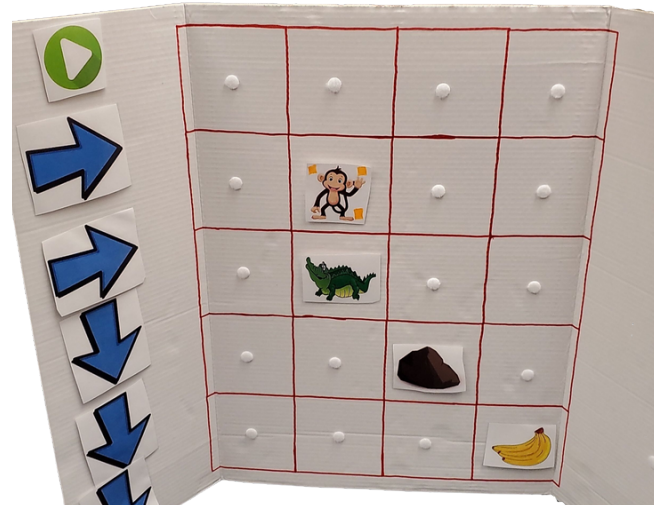

Code: Giving instructions to a computer in a way it understands.

Skills/Learned Practiced:

Mistakes are okay! This is how we learn! 😊

Algorithm: Step by step instructions in order to complete a task (we actually do this all of the time!)

Computational Thinking: A problem solving technique involving decomposition, algorithm, abstraction and pattern recognition.

The monkey board helped us with writing algorithms and critical thinking skills!

All resources from the week can be found by scanning the QR Code or at bit.ly/3qf5jl6
