

# Coding Club Week 5

Not Bugs Like Us!

## Debugging!

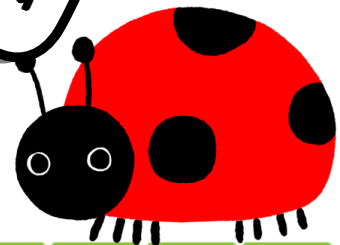

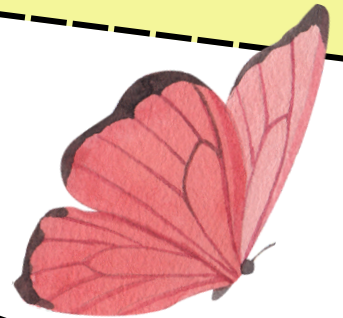

Bugs are just a name for mistakes or errors in code. Debugging is the process of finding and fixing bugs in the code. Mistakes are not a bad thing! In fact they help us learn but they can sometimes be frustrating. It is okay to revisit a code after your brain has had time to cool down.

HI! I AM DOT! THANK YOU FOR CODING WITH ME! WE TOLD STORIES, PLAYED GAMES AND ANSWERED QUESTIONS!

Help your brain cool by asking a grown up, taking deep breaths, getting fresh air or trying again after a good nights sleep!
