

Coding Club Week 8

Looks like Pig
and Dog are
going to race!

Abstraction!

Abstraction is one of the 4 parts of Computational Thinking! **It means to ignore the details that are not important and focus on the ones that matter.** If there was a code that made a wizard move to a star and we wanted a monkey to move towards a banana, we wouldn't look at the wizard's outfit, how tall the wizard is or the color of the star.

Code a Race!
