

WHAT ARE ALGORITHMS?

Algorithms are step by step directions in order (sequence) to complete a task or goal.

Examples: Recipes, Brushing Teeth

REAL LIFE APPLICATION/ CONNECTION:

Algorithms are sets of instructions that can take the form of anything from images, words or even just in our thoughts. They have become a fundamental part of our lives with widespread use across various domains. From search engines that help us locate information to navigation systems, algorithms are everywhere. In fact, most people interact with algorithms every day, often without even realizing it!

HOW DID WE PRACTICE THIS SKILL?

- [Forest Animal Algorithms](#)
 - Students followed an algorithm in order to draw various forest animals.
 - Scan the QR code for a printable version
- [Scratch Jr.](#) - Dance Party

CONTINUE LEARNING:

- Draw more animals
- Code and Create more projects on Scratch Jr.
- Discuss all of the algorithms your child follows
